

Selection				Potential Interventions	Technology Enabler applied in Intervention	ID/Link	Project Summary
				Reform explicitly discriminatory laws and regulations and promote laws that support women's inclusion	global and regional digital accountability maps	Equality in Law for Women and Girls	MULTI-REGION: UN Women Equality in Law for Women and Girls by 2030. Includes global and regional digital accountability maps for 20 countries that track repeal of discriminatory laws, promotion of WEE, elimination of child marriage laws, and promotion equality in family relations.
				Facilitate de facto gender-neutral implementation	mobile application	P146244	EGYPT: Promoting Innovation for Inclusive Financial Access project Component 1: Develops Tamweely; a mobile Arabic-language application to educate SMEs on corporate governance, proper accounting records, taxes, and regulations affecting SMEs. Assists WSMEs in overcoming mobility barriers.
				For new legislation, implement awareness campaigns targeted toward women	television, soap operas, other media channels	P160806	DRC: SME Development and Growth Project Subcomponent 1.3 uses television, soap operas, other media channels to disseminate information about newly passed legislation on family code and land, labor and equality laws that support female entrepreneurship and WEE.
				Target women-owned/- led firms via strategic communications, awareness-raising and information sharing	mobile application	P146244	EGYPT: Promoting Innovation for Inclusive Financial Access project Component 1: Develops "Tamweely" a mobile Arabic-language application to educate firms on corporate governance, proper accounting records, taxes, and regulations affecting MSMEs.
				Target women-owned/- led firms via strategic communications, awareness-raising and information sharing	television, soap operas, other media channels	P160806	DRC: SME Development and Growth Project Subcomponent 1.3 uses television, soap operas, other media channels to disseminate information about newly passed legislation on family code and land, labor and equality laws that support female entrepreneurship and WEE.
				Establish gender-sensitive feedback loops and/or other mechanisms that channel data on women's priorities and constraints into reform processes	mobile application	P130891	MONGOLIA: Support for Accountable, Responsible, and Transparent Government project Component 1.2 develops citizen-facing dashboard that aggregates citizens' incoming messages in informative ways, allows citizens to disaggregate data by sex. Includes development of mobile applications that address grievances collected in feedback loops.
				Include women and women's support organizations in decision-making processes (e.g., PPD, B2G feedback loops, consultations, and working groups)	mobile applications	P130891	MONGOLIA: Support for Accountable, Responsible, and Transparent Government project Subcomponent 2.3 seeks increased female participation in development of innovative digital tools, such as apps, that increase the number of female- targeted solutions identified by information provided by B2G feedback loops and developed by WSMEs in government priority sectors.
				Simplify business registration processes	e-service platform	P171172	JORDAN: Economic Opportunities for Jordanians and Syrian Refugees PfR Component 7 includes Ministry of Social Development permitting issuance of e-license for home-based childcare businesses. Includes communications campaign publicizing e-business registration and e-licensing procedures.
				Improve industry and firm policies and practices to attract and retain more female workers	GIS data mapping	P147235	WEST BANK AND GAZA: Economic Development across Fragile Communities project Component 1 works with Ministry of Tourism to teach entrepreneurs, especially women, about tourism industry and Component 2 provides trainings on how to use Geographic Information Systems (GIS) data to develop guided tours along Abraham Path.
				Improve industry and firm policies and practices to attract and retain more female workers	not applicable	P120843	BANGLADESH: BD Private Sector Development project Component 2 includes development of childcare operations guidelines and manuals for the economic zones and hi-tech parks that are adopted by Bangladesh Economic Zones Authority (BEZA) and Bangladesh High Tech Park Authority (BHTPA). NOTE: this component was added after the PAD was approved and is referred to in the ISRs for April 2020 and October 2020.
				Focus government services on sectors with high female participation (e.g., childcare subsidies, labor reform, investment services)	digital satellite/airborne imagery	P164551	MOZAMBIQUE: Land Administration project Component 2 includes local government use of high-resolution orthorectified digital satellite/airborne imagery for community land delimitation, taking into consideration women's involvement in farming, their legal rights and methodologies that promote gender equality (e.g.; providing communities with lists of all community co-rights holders, including women, and active promotion of co-titling individual parcels. Component 1 includes education and training on women's land rights.
				Include women-owned/- led firms in government and industry-specific supplier databases	digital database	601417	VIETNAM: Private Sector Competitiveness/Supplier Development Program (VNPSC) includes Component 2.1 high quality profiles of pre-screened local suppliers made available through development and launch of national, shared online supplier database accessible by foreign firms.
				Train public officials to understand gender-related constraints and challenges to promote greater equality in public services	mobile phones	P151083	SUB-SAHARAN AFRICA (DRC, Rwanda, Uganda): Africa Great Lakes Trade Facilitation project Sub-component 2.2 incorporates comprehensive gender-awareness and conflict resolution training for border agents, including capacity-building to use digital tools for reporting sexual harassment and GBV in borderlands.
				Encourage public provisions (such as new laws, subsidies, or firm-level incentives, etc.) to increase women's access to care services	not applicable	P120843	BANGLADESH: BD Private Sector Development project Component 2 includes development of childcare operations guidelines and manuals for the economic zones and hi-tech parks adopted by Bangladesh Economic Zones Authority (BEZA) and Bangladesh High Tech Park Authority (BHTPA).
				Encourage public provisions (such as new laws, subsidies, or firm-level incentives, etc.) to increase women's access to care services	not applicable	P171063	CAMBODIA: Community-based Childcare for Garment Factory Workers Project establishes sustainable community-based childcare services for garment factory workers that improve employment and labor outcomes, reduce unpaid household childcare, and improve child development.
				Strengthen political awareness of and commitment to increase financial access for women	digital platform	FIGI (no public link)	MULTI-REGION: Financial Inclusion Global Initiative (FIGI) in China, Egypt & Mexico includes country-level commitment to strengthen and implement national programs related to core technology drivers of financial inclusion (electronic payment acceptance, digital ID for financial services, and security) to meet national financial access targets.
				Strengthen legal and regulatory framework for financial consumer protection and an enabling technology environment	national digital registries and databases that store sensitive information	WBG Universal Financial Access 2020 initiative	MULTI-REGION: WBG Universal Financial Access 2020 initiative focuses on 25 priority countries and utilizes government policies to create regulatory environments that enable access to transaction accounts, establish national biometric identity databases and virtual payment accounts, as well as digital payment interoperability.
				Strengthen legal and regulatory framework for financial consumer protection and an enabling technology environment	financial technology (fintech), big data	FIGI	MULTI-REGION: Financial Inclusion Global Initiative (FIGI) in China, Egypt, & Mexico includes programs to support development of enabling legal & regulatory frameworks for fintech to promote financial inclusion, enhance consumer protection & awareness, and improve ICT for digital financial services.

Selection				Potential Interventions	Technology Enabler applied in Intervention	ID/Link	Project Summary
				Improve quality and availability of sex-disaggregated data across the range of financial products and services, including new digital financial products and fintech offerings	computers	FISF Country Support Program for Pakistan	PAKISTAN: Financial Inclusion Support Framework (FISF) Country Support Program for Pakistan sex-disaggregated data pilot included sorting information based on data from the Computerized National Identity Card (CNIC).
				Increase availability of and access to financial products/ services, including digitally- enabled, digitally-delivered solutions for women- owned/-led firms	e-service platform	P130891	MONGOLIA: Support for Accountable, Responsible, and Transparent Government project Subcomponent 2.4 e-Property Registration System (ePRS) enables citizens and business to use digital system to document property purchases, sales, etc. and provides banks with better information about prospective borrowers.
				Increase availability of and access to financial products/ services, including digitally- enabled, digitally-delivered solutions for women- owned/-led firms	proprietary digital financial services, social media platforms	P167543	NIGER: Smart Villages for Rural Growth and Digital Inclusion project Sub- Component 3.1.1 includes creation of digital centers for delivery of e- financial/ digital services. Digital financial centers are promoted on social media through financial and literacy campaigns with content specific to women.
				Improve other financial infrastructure such as collateral registries and factoring platforms	national digital registry that stores sensitive information digital platform	CBN National Collateral Registry	NIGERIA: Central Bank of Nigeria (CBN) developed an online collateral registry to secure loans against movable assets such as machinery, livestock and inventory.
				Improve other financial infrastructure such as collateral registries and factoring platforms	national digital registry that stores sensitive information digital platform	Personal Property Security Registry Sys- tem of Malawi	MALAWI: Public Sector Reforms Commission developed online public collateral registry database for financial institutions to register security interests in movable property, mitigate risk of customers and diversify credit portfolios to include SMEs.
				Improve other financial infrastructure such as collateral registries and factoring platforms	national digital registry that stores sensitive information digital platform	Central Bank of Liberia online movable collateral registry	LIBERIA: Central Bank of Liberia (CBL) created online movable collateral registry to secure business & individual loans.
				Improve other financial infrastructure such as collateral registries and factoring platforms	digital platform	P152307	JAMAICA: Access to Finance for MSMEs : Component 3 includes pilot digital reverse factoring services platform to provide SMSEs with asset-based financing in which MSMEs sell their accounts receivable at a discount to a third party and receive immediate cash.
				Strengthen credit reporting systems and other sources of data useful for financial decisions	national digital database that stores sensitive information	P167543	NIGER: Smart Villages for Rural Growth and Digital Inclusion project Sub-component 3.3 includes creation of digital database to collect data on rural populations in order to enable credit scoring
				Support reform geared towards low-risk accounts with tiered Know-Your-Customer rules	digital database and registry that stores sensitive information	P167543	NIGER: Smart Villages for Rural Growth and Digital Inclusion project Sub-component 3.3 includes creation of digital database to store information collected on rural populations to improve understanding of their e-financial needs and establish e-KYC (know your customer) registry.
				Support reform geared towards low-risk accounts with tiered Know-Your-Customer rules	digital database and registry that stores sensitive information	P130891	MONGOLIA: Support for Accountable, Responsible, and Transparent Government project Subcomponent 2.4 e-Property Registration System (ePRS) enables citizens and businesses to use digital system to document property purchases, sales, etc. and provides banks with better information about prospective borrowers.
				Incentivize financial institutions to develop products and services that meet women's needs (e.g., alternative-data-based lending, psychometric testing, payments, savings, credit and insurance)	Fintech innovations: big data and machine learning	P122764	ETHIOPIA: Women Entrepreneurship Development Project (WEDP) Component 1 includes use of fintech to conduct interactive assessment of potential borrowers to predict likelihood of loan repayment.
				Incentivize financial institutions to develop products and services that meet women's needs (e.g., alternative-data-based lending, psychometric testing, payments, savings, credit and insurance)	Fintech innovations: big data and machine learning, tablets	P171245	ETHIOPIA: Innovations in Financing Women Entrepreneurs (IFWE) project Component 2 includes leveraging fintech to reduce/eliminate collateral requirements for WMSMEs and explores piloting programs that increase access to capital leasing services, tailored insurance products and micro-equity investment mechanisms.
				Incentivize financial institutions to develop products and services that meet women's needs (e.g., alternative-data-based lending, psychometric testing, payments, savings, credit and insurance)	Fintech innovations: big data	State Bank of India (SBI) e-Smart SME project	INDIA: State Bank of India (SBI) e-Smart SME project offers collateral-free working capital loan for sellers on e-commerce platforms via online loan application & approval process. Fintech algorithms analyze users' social network behavior and mobile phone usage patterns to develop credit scores.
				Seek gender diversity among bank agents and provide them with incentives to register women for digital accounts, including providing technology support for women users	data mining tools, software	603215	TUNISIA: Banking on Women (BoW) Champion & Digital Transformation project Component 2 includes workshops, computerized activity tools, dashboard template, and incentives scheme to help motivate bank agents to acquire new women-led enterprise customers for digital financial services.
				Support the development of digital incubators, accelerators and early-stage funding programs for WSMEs	digital platform	P161317	KENYA: Industry and Entrepreneurship Project Component 1 includes digital platform to connect business incubators, accelerators and technology boot camp providers with global expertise, international networks, and investors.
				Support the development of digital incubators, accelerators and early-stage funding programs for WSMEs	digital platforms	P170688	BANGLADESH: Private Investment & Digital Entrepreneurship Project Component 4 includes developing digital entrepreneurship & innovation hubs in technological universities to increase market entry and growth rates of digital startups and create a gender-inclusive culture for digital entrepreneurship.
				Support the development of digital incubators, accelerators and early-stage funding programs for WSMEs	mobile applications	P130891	MONGOLIA: Support for Accountable, Responsible, and Transparent Government project Subcomponent 2.3 includes an Apps competition to provide early-stage financing for development of innovative digital tools by WSMEs that increase the number of female-targeted solutions in government priority sectors.
				Support the development of digital incubators, accelerators and early-stage funding programs for WSMEs	interactive program website	XL Africa	AFRICA: XL Africa business accelerator for SMEs with digital products/services that offers webinars, global mentoring and angel investors platform.
				Support the development of digital incubators, accelerators and early-stage funding programs for WSMEs	crowdfunding digital platform	Kenya Climate Innovation Center (KCIC)	KENYA: Climate Innovation Center (KCIC -funded by WBG InfoDev) Crowdfund Investing Pilot to help entrepreneurs raise capital.

Selection				Potential Interventions	Technology Enabler applied in Intervention	ID/Link	Project Summary
				Provide training on digital financial enablers such as mobile savings mechanisms	mobile phone application	WBG Gender Innovation Lab Women Connect Project	TANZANIA: Business Women Connect project provides training to women business owners on use of M-Pawa mobile savings platform to save money more securely and in some cases combined it with business training.
				Provide training on digital financial enablers such as mobile savings mechanisms	e-Wallets, computer, mobile phone	P171172	JORDAN: Economic Opportunities for Jordanians and Syrian Refugees Program for Results (PfR) Component 6 provides training in accessing digital finance through SIM cards and e-Wallets.
				Build capacity of institutions serving women-owned businesses, including business associationsand networks86	technology innovation hubs, media outlets	P170688	BANGLADESH: Private Investment & Digital Entrepreneurship Project , Sub-component 4 includes piloting entrepreneurship and innovation hubs in Bangladesh's technological universities and business schools, specifically promoting digital entrepreneurship among women through media outlets..
				Build capacity of institutions serving women-owned businesses, including business associationsand networks86	technology innovation hubs, mobile applications	P156259	SENEGAL: Digital Entrepreneurship Senegal project Component 1 strengthens CTIC Dakar's (milab West Africa) institutional capacity to launch globally competitive mobile and digital technology businesses.
				Improve financial literacy by providing training and facilitating networking	digital platform	P103499	NIGERIA: Growth and Employment project Component B includes a Business Innovation & Growth (BIG) digital platform for SMEs to register themselves, receive business development services (BDS) and sectoral training.
				Improve financial literacy by providing training and facilitating networking	interactive program website, including e- Learning; tablets	P145215	MULTI-REGION: New Generation of Women Entrepreneurs (Women X): NIGERIA & PAKISTAN Component 2.2.1 includes e-Learning modules and Component 2.1.1 includes virtual e-mentoring program.
				Deliver training and facilitate networking to start and grow businesses through increased peer-to-peer learning	mobile phones, interactive websites, 24/7 call center	P128307	PAKISTAN: Sindh Agricultural Growth Project Component A.2 includes ICT-based technologies to deliver agriculture extension and marketing for farmers/producers, including information dissemination through mobile phones, 24/7 call center, interactive websites, and international peer learning.
				Deliver training and facilitate networking to start and grow businesses through increased peer-to-peer learning	ICT training on technology use, mobile technology	P160806	DRC: SME Development and Growth Project Subcomponent 1.2 uses training modules about internet-based and mobile technology to promote women entrepreneurs' future involvement in digital peer-to-peer support and networks.
				Deliver training and facilitate networking to start and grow businesses through increased sector-specific technical skills	digital platform	P161317	KENYA: Industry and Entrepreneurship Project Component 1 includes interventions that support digital literacy and skills in growing sectors, including rapid technology skills trainings (bootcamps) for youth and women in digital sectors, fostering links and investments in digital entrepreneurship.
				Deliver training and facilitate networking to start and grow businesses through increased sector-specific technical skills	ICT, computer programming, software develop-ment	P152441	GEORGIA: National Innovation Ecosystem (GENIE) project Component 2 includes training programs focused on digital economy skills (computer programming, software development) and includes a dedicated ICT training program.
				Deliver training and facilitate networking to start and grow businesses through increased sector-specific technical skills	digital platform	P103499	NIGERIA: Growth and Employment project Component B includes a Business Innovation & Growth (BIG) web-based platform for SMEs to register themselves, receive business development services (BDS) and sectoral training.
				Deliver training and facilitate networking to start and grow businesses through increased sector-specific technical skills	GIS data mapping	P147235	WEST BANK AND GAZA: Economic Development across Fragile Communities project Component 1 works with Ministry of Tourism to teach entrepreneurs, especially women, about tourism industry and Component 2 provides trainings on how to use Geographic Information Systems (GIS) data to develop guided tours along Abraham Path.
				Deliver training and facilitate networking to start and grow businesses through increased business and soft skills	mobile phones	WBG Gender Innovation Lab	TANZANIA: Business Women Connect project invites WMSMEs to use M-Pawa mobile savings platform, participate in business skills training, and improve decision-making skills and confidence.
				Deliver training and facilitate networking to start and grow businesses through increased business and soft skills	virtual, interactive trainings	603670	ARMENIA: Women Entrepreneurship Project Component B.1 includes virtual and in-person (when possible) psychology-based Personal Initiative Training (PIT) to develop mindset associated with proactive, entrepreneurial behavior.
				Help women cross over into male-dominated, profitable sectors (through mentoring programs, role models and information-sharing)	robotics, computer coding/ programming	P165558	DJIBOUTI: Support for Women and Youth Entrepreneurship project Sub-component 2.1 includes iLab robotics and coding courses for young people from high schools and colleges. Participation in Pan African Robotic Competition, Africa Up Tunis, Entrepreneurship World Cup promotes mentoring, information-sharing, and role models.
				Enable women to benefit from existing mixed-sex networking and mentoring opportunities	digital platform	P162835	EGYPT: Catalyzing Entrepreneurship for Jobs project Component 3 includes digital match-making platform to connect entrepreneurs with investors and provide training, mentoring, coaching and business development services, especially to women entrepreneurs.
				Enable women to benefit from existing mixed-sex networking and mentoring opportunities	interactive pro-gram website, webinars, digital platform	XL Africa	AFRICA: XL Africa business accelerator for SMEs with digital products/services that offers webinars, global mentoring and angel investors platform.
				Enable women to benefit from existing mixed-sex networking and mentoring opportunities	digital platform	Digital Opportunity Trust (DOT)	MULTI-REGION: Digital Opportunity Trust , Digital Ambassadors Program that connects youth leaders with global networks.
				Provide entrepreneurs with firm-level wrap-around services, such as targeted technical assistance, business advice, and coaching, along with cash grants or small loans (including for technology use and implementation)	digital platform	P122764	ETHIOPIA: Women Entrepreneurship Development Project (WEDP) Component 1 includes smalls loans to WSMEs by participating MFIs. Sub-component 2a includes improved delivery of coaching, mentoring, and business information through ICT technologies to growth-oriented WSMEs eager to invest in more productive technology.
				Provide entrepreneurs with firm-level wrap-around services, such as targeted technical assistance, business advice, and coaching, along with cash grants or small loans (including for technology use and implementation)	digital platforms, including for digital financial services (DFS) and e-com-merce; mobile technology	P160806	DRC: SME Development and Growth project Component 1 includes combination of training and cash subsidies to support entrepreneurial activities of youth and women. Technology modules include promotion of Internet-based and mobile technology to overcome asymmetry of information, access to financial services (online and mobile banking), and e-commerce. Subcomponent 2.1 includes matching grants to established SMEs, at least 40% of whom must be WSMEs.

Selection				Potential Interventions	Technology Enabler applied in Intervention	ID/Link	Project Summary
				Provide entrepreneurs with firm-level wrap-around services, such as targeted technical assistance, business advice, and coaching, along with cash grants or small loans (including for technology use and implementation)	Awareness campaign on social media platforms, digital program application	P151831	KENYA: Youth Employment and Opportunities project Component 1 includes technical skills training, business support services and Sub-component 2.1 includes business plan competition, and cash prizes of either USD9,000 or USD36,000.
				Provide entrepreneurs with firm-level wrap-around services, such as targeted technical assistance, business advice, and coaching, along with cash grants or small loans (including for technology use and implementation)	online investment platform and marketing portal	P146469	SENEGAL: Tourism and Enterprise Development project Component 2 includes trainings on business plan writing, multiple rounds of business plan competitions with cash prizes, and almost US\$2m in grants for SMEs through the Senegal Market Access Facility.
				Organize business plan competitions and entrepreneurship programs for WSMEs	ICT training on technology use	P160806	DRC: SME Development and Growth Project Subcomponent 1.2 includes business plan competitions in which top startup entrepreneurs receive smaller grants and established SMEs receive larger sized grants.
				Organize business plan competitions and entrepreneurship programs for WSMEs	Awareness campaign on social media platforms, digital program application	P151831	KENYA: Youth Employment and Opportunities project Component 1 includes technical skills training, business support services and Sub-component 2.1 includes business plan competition, and cash prizes.
				Organize business plan competitions and entrepreneurship programs for WSMEs	not applicable	P167543	NIGER: Smart Villages for Rural Growth and Digital Inclusion project Sub-component 3.2.3. includes sub-grants of up to US\$250,000 through a business competition plan for Fintech companies & startups. Sub-grants cover seed funding, operation costs, costs to pilot new digital financial & nonfinancial solutions for women and farmers.
				Organize business plan competitions and entrepreneurship programs for WSMEs	digital investment platform and marketing portal	P146469	SENEGAL: Tourism and Enterprise Development project Component 2 includes trainings on business plan writing, multiple rounds of business plan competitions with cash prizes, and almost US\$2m in grants for SMEs through the Senegal Market Access Facility.
				Support the development of digital incubators, accelerators, and early-stage funding programs	digital platforms	P161317	KENYA: Industry and Entrepreneurship Project Component 1 includes online platform to connect business incubators, accelerators and technology boot camp providers with global expertise, international networks, and investors.
				Support the development of digital incubators, accelerators, and early-stage funding programs	technology innovation hubs, media outlets	P170688	BANGLADESH: Private Investment & Digital Entrepreneurship Project Component 4 includes developing digital entrepreneurship & innovation hubs in technological universities to increase market entry and growth rates of digital startups and create a gender-inclusive culture for digital entrepreneurship.
				Support the development of digital incubators, accelerators, and early-stage funding programs	mobile applications	P130891	MONGOLIA: Support for Accountable, Responsible, and Transparent Government project Subcomponent 2.3 includes an Apps competition to provide early-stage financing for development of innovative digital tools by WSMEs that increase the number of female-targeted solutions in government priority sectors.
				Support the development of digital incubators, accelerators, and early-stage funding programs	interactive program website, webinars, digital platform	XL Africa	AFRICA: XL Africa business accelerator for SMEs with digital products/services that offers webinars, global mentoring and angel investors platform.
				Support the development of digital incubators, accelerators, and early-stage funding programs	crowdfunding digital platform	Kenya Climate Innovation Center (KCIC)	KENYA: Climate Innovation Center project (KCIC -funded by WBG InfoDev) Crowdfund Investing Pilot to help entrepreneurs raise capital.
				Leverage apprenticeships and on-the-job learning opportunities	internet-based technical training	P122764	ETHIOPIA: Women Entrepreneurship Development Project (WEDP) Component 2 includes technology training at technical, vocational colleges to enhance classroom learning, provide workshops, product development and on-the-job training.
				Leverage apprenticeships and on-the-job learning opportunities	digital and e-commerce platforms	IFC Digital2Equal	MULTI-REGION: IFC Digital2Equal matches women with participating private companies (AirBNB, Uber, Facebook) to learn how their online platforms function, as employee or provider of services or products.
				Provide gender sensitization training for men and couples that includes instructionon the benefits of women's economic participation	ICT training on technology use	P160806	DRC: SME Development and Growth Project Subcomponent 1.2 includes involving women entrepreneur's spouses and family in special events for sensitization on legal changes and reinforcement of the tenets of WEE.
				Provide gender sensitization training for men and couples that includes instructionon the benefits of women's economic participation	mobile application	P171245	ETHIOPIA: Innovations in Financing Women Entrepreneurs (IFWE) project Component 1 collaborates with the Digital Opportunities Trust to pilot an app- based on-demand coaching and business development services training that includes new curriculum involving male partners to encourage greater support for women's economic activities.
				Strengthen women's resilience and coping mechanisms to deal with social backlash through soft skills training	virtual, interactive trainings	603670	ARMENIA: Women Entrepreneurship Project Component B.1 includes virtual and in-person (when possible) psychology-based Personal Initiative Training (PIT) to develop mindset associated with proactive, entrepreneurial behavior.
				Identify and integrate women entrepreneurs, business professors, and advisors to join trainer cadre	videos	WBG Gender Innovation Lab	TANZANIA: Business Women Connect project Component 2 includes cadre of all-female business counselors with previous business experience who taught business skills trainings to WSMEs through activity-based learning and videos..
				Identify and integrate women entrepreneurs, business professors, and advisors to join trainer cadre	digital learning platform	604378	INDONESIA: Farmer Capacity Development Through Digital Platform and Financing Sub-Component 1.C includes women-led facilitators being trained in use of digital learning platform, including quizzes to test knowledge of farmers administered by trainers on tablets provided by the project.
				Provide capital and business development skills through matching grants to WSMEs	ICT, training on technology use	P160806	DRC: SME Development and Growth Project Subcomponent 2.1 Enhancing growth and performance of SMEs includes matching grants to established SMEs, at least 40% of whom must be WSMEs. Matching grants were combined with technology modules that promoted Internet-based and mobile technology to access information and financial services (online and mobile banking) as well as e-commerce.
				Provide capital and business development skills through matching grants to WSMEs	virtual, interactive technical expertise	P152441	GEORGIA: National Innovation Ecosystem (GENIE) project includes Component 3 startup and Innovation matching grants to entrepreneurs. Coaching & technical assistance with applications and technology commercialization process provided by local & international experts.

Selection				Potential Interventions	Technology Enabler applied in Intervention	ID/Link	Project Summary
				Provide capital and business development skills through matching grants to WSMEs	interactive website	P147354 (no public link to project documents)	MEXICO: High Impact Entrepreneurship Program (HIEP) operated by the National Institute of the Entrepreneur (INADEM) included online surveys that innovative SMEs complete to be considered for matching grants.
				Build capacity of institutions serving women-owned businesses	digital platform	P170688	BANGLADESH: Private Investment & Digital Entrepreneurship Project , Sub- component 4 includes piloting entrepreneurship and innovation hubs in Bangladesh's leading technological universities and business schools, specifically promoting digital entrepreneurship among women through media-based challenge program offering reduced prices of ITS and ITeS rapid training programs.
				Build capacity of institutions serving women-owned businesses	not applicable	P156259	SENEGAL: Digital Entrepreneurship Senegal project Component 1 strengthens CTIC Dakar's (mLab West Africa) institutional capacity to launch globally competitive mobile and digital technology businesses.
				Build capacity of institutions serving women-owned businesses	technology training	P171034	ETHIOPIA: Digital Foundations Project Component 3 seeks to lay foundation for high-growth digital industries through gender-inclusive, ecosystem-level support that includes promotion of digital skills and entrepreneurship. Emphasizes gender equity in recruitment and retention by ensuring inclusion of women in all decision- making bodies under the project.
				Develop training programs for women (e.g., use of technology tools to access markets, trade logistics, supplier standards, etc.)	e-commerce platform	P148638	MENA: Virtual Marketplace (VMP) Tunisia, Morocco, Jordan project Sub-component 2.1 included a e-Learning platform and online training workshops designed and taught by international VMP (TradeKey, E-Bay) experts.
				Develop training programs for women (e.g., use of technology tools to access markets, trade logistics, supplier standards, etc.)	not applicable	P168392(Note: no public link)	MENA: E-Commerce for Women-Led SMEs in Algeria, Djibouti, the Arab Republic of Egypt, Jordan, Lebanon, Morocco, and Tunisia (We-Fi) expands on P148638. Sub-component 1.a recruits VMP advisors, trainers, coaches to train WSMEs. Sub- Component 1.b connects WSMEs online to local, regional and international VMPs.
				Develop training programs for women (e.g., use of technology tools to access markets, trade logistics, supplier standards, etc.)	ICT, mobile phones	P170604	SIERRA LEONE: Smallholder Commercialization and Agribusiness Development Project (P153437) and Additional Financing (P170604) Sub-component B2 includes market access and coordination improvements through ICT or cell-phone based price information systems.
				Design gender-sensitive trade/customs logistics, including digital based services	ICT, mobile phones, SMS text messaging	P151083	SUB-SAHARAN AFRICA (DRC, RWANDA, UGANDA): Africa Great Lakes Trade Facilitation Project Sub-component 2.1 includes using ICT reporting mechanisms & 3rd party IT monitoring to inform small-scale and women traders of requirements for cross- border trading, monitor enforcement of regulations, and address corruption, sexual harassment and physical violence in borderlands.
				Design gender-sensitive trade/customs logistics, including digital based services	e-government services	TANCIS (Tanzania Customs Integrated System)	TANZANIA: TANCIS Project is a web-based system implemented by Tanzanian government and Investment Climate Facility for Africa that issues licenses, processes electronic customs declarations and electronic payments, issuance of receipts, monitoring movement of transit cargo and bond operations.
				Enhance technology, skills, and production processes to integrate women-owned/- led firms into value chains	e-services (digital payments)	P162599	BENIN: Digital Rural Transformation Project Component 1 includes improving access to broadband services in targeted rural communities and developing high potential value chains, including digitization of value chain payments, and improving the business climate/PPPs, with a focus on women in the agriculture sector.
				Enhance technology, skills, and production processes to integrate women-owned/- led firms into value chains	Enterprise Resource Planning (ERP) software	P167543	NIGER: Smart Villages for Rural Growth and Digital Inclusion project includes Sub- component 3.2.2. which facilitates digitization of payments made to farmers through Enterprise Resource Planning (ERP) software, enabling agriculture federations in the value chains to better manage relationship with co-operatives and for co-operatives in turn to better manage their relationship with member farmers in the value chain.
				Link women to local, regional, and international markets through supplier databases	digital database	601417	VIETNAM: Private Sector Competitiveness/Supplier Development Program includes Component 2.1 Improved information on local suppliers made available through development and launch of a high-quality online supplier database.
				Link women to local and international markets through meet-the-buyer events and training	digital platform	Intracen	MULTI-REGION: Intracen , the ICT-led Global Platform for Action on Sourcing from Women Vendors, seeks to increase the amount of corporate, government and institutional procurement secured by women vendors. WSMEs receive training and market linkage opportunities through Buyer Mentor Groups and participate in an annual Women Vendors Exhibition and Forum.
				Link women to regional and international markets through export promotion events and study tours	e-Learning and online training modules	P147438	MONGOLIA: Export Development Project component 2.1 includes producing and providing free e-Learning and online training modules on export promotion and supporting research; includes matching grants for product quality certification costs.
				Increase women's access to government procurement programs	digital platform	ChileCompra	CHILE: ChileCompra is the Chilean Government e-procurement program that includes an e-commerce platform to fully support digital supplier processes for SMEs.
				Increase women's access to government procurement programs	computers	(P168394) Note: no publiclink	SENEGAL: Connecting National Procurement Needs with Women-Owned SMEs in Senegal project Component 2 includes skills development program focused on technical advisory to improve themes important for public procurement bidding (overall business development including related to technology, soft skills).
				Support technology extension services	digital platforms, applications	P162599	BENIN: Digital Rural Transformation Project Subcomponent 2.2 includes improving outreach & quality of crop extensions & advisory services through online platforms and applications with local content.
				Support technology extension services	mobile phones, 24/7 call center, interactive websites	P128307	PAKISTAN: Sindh Agricultural Growth Project Component A.2 includes introducing ICT-based technologies for delivery of agriculture extension and marketing to farmers/producers, including information dissemination through mobile phone, 24/7 call center and interactive websites.
				Support technology extension services	smart phones	P170604	SIERRA LEONE: Smallholder Commercialization and Agribusiness Development Project (P153437) and Additional Financing (P170604) Sub-component B2 includes market access and coordination improvements through ICT or mobile-based price information systems.
